TSH 422

We're recruiting!

Our research spans a broad range of areas in psychology & music cognition, including sensorimotor integration, audiovisual perceptual processing, auditory alarms in medical devices, associative memory for musical stimuli, auditory timing judgments, the communication of emotion in music, and the social dynamics of music. If you are interested in getting involved with our research next academic year, as a 2QQ3, 3QQ3, or 4QQ3 student, drop by our open house! Please email maplelab.assistant@gmail.com if planning on attending.
